Often described as a large, ape-like being covered in white or gray fur, the Yeti has captured the imagination of adventurers and folklore enthusiasts for centuries. With the oval positioned so the longer side is horizontal and the shorter side is vertical, insert 14 mm safety eyes between Rounds 4 and 5 on either side of the face so they line up with the magic ring. Find the center point between the eyes and count 4 rounds down to locate where the center of the smile should be. Take a medium strand of Black yarn and use a tapestry needle to embroider the mouth by making 2 diagonal lines that meet in the center to form a wide V. Set aside the face.

☐ Assembly

Gather all the pieces, a tapestry needle, and a pair of scissors.

1. Attach the face to the front of the head so that the bottom of the face is 1 round up from the neck (the narrowest part of the body) and the top of the face is 6 rounds down from the top of the head.
2. Stuff the horns and attach them to the top of the head. The curve of the horn should point toward the center, and the inside edge of the base of each horn should be 4 rounds from the center.

3. Attach the arms at the shoulder, the round below the narrowest point of the neck. They should be attached on a slight diagonal, with the inside corner of the arm higher than the outside so that the arms are angled slightly forward.
4. Stuff the feet, then set the Yeti body upright on a flat surface. The heel of the foot should rest on the flat surface with the toes straight up. Line up the foot with the body and attach it where the last round of the foot meets the body. Repeat these steps on the other side with second leg. The feet should be around 5 sts apart and centered on the front of the body.
